

7th of January 2025 • 3 p.m. • Lecture hall O2

Distinguished Lecture

Department of Computer Science

The "Distinguished Lecture" series hosted by the Department of Computer Science consists of high-quality lectures and discussions with national and international outstanding scientists. These events are intended to inspire research at our department and promote knowledge exchange between scientists and are open to all interested parties.

Keynote Speaker:

Christian Kästner – Carnegie Mellon University

"From Models to Systems: On the Role of Software Engineering for Machine Learning"

For more details about the programme and event, please visit our website. Registration for this event is not required.
